

Company
Profile

MORIS

MORIS ITALIA

In synthesis

- More than 230.000 elevators powered by our components
- More than 6.500 Mylift platforms delivered throughout the world, since 1997
- More than 1.000 elevators model SM2 produced since 2003
- Top producer in oleodynamic technology in the elevator sector
- Product quality granted by the testing process of every component
- Customer service as our main strategic priority

**30 years of success in the global
elevator market**

OUR HYSTORY

Founded in 1981 in Malgesso (few kilometers north of Milan) Moris Italia has always placed innovation as the focus of its growth, establishing successful relationships with international groups and with hundred of local installers; asserting, in the global market for the production of oleo dynamic components (pistons and power units) for elevators and lifting platforms; products that, still to this day, constitute the backbone of the company.

The Moris Italia research and development department, heart of the company structure, has always had the improvement of the energetic efficiency as its main objective.

Result of this ideal has been the development of innovative products, such as: The guided ram device, device used for the reduction of the rams installed in lifts with travel up to 18-20 meters; oleodynamic power units inverter MED; power units with electronical valve.

To complete that, since 1997 Moris Italia has been able to offer special complete oleodynamic elevators.

The Mylift lifting platform – product that has seen its introduction in 2010 of the power unit with submerged motor – limits the minimal oil level necessary, granting an immediate energy saving and a environmental benefit.

The great success of this product has lead us into a constant update and evolution of both its technical characteristics, with the enlargement of the maximum load up to 2000 kg, and aesthetic – functional, thanks to the use of customizable materials and simple interfaces.

The SM2 elevator with low pit and headroom was created in 2003 and consolidates its primacy in the following years, with the installation of more than 250 elevators at the service of the anti-seismic habitations built after the earthquake in L'Aquila.

During 2017, after the new EU dispositions, the SM2 elevator evolves and the new SM2.1 is announced.

Built with attention for every detail, SM2.1 is enriched with IOT solutions (Internet Of Things) for a complete connection to the web and energy saving systems.

Innovation, Our pivot point

INNOVATION PRODUCTION AND FLEXIBILITY

A ever growing productive reality has followed the development of our products and consolidates our commercial position.

The flexibility of our two production units in Italy and in Spain has allowed us to face any order from all over the world in a promptly and quick way, maintaining a maximum quality level.

To support our products expansion , technical-commercial realities have been created in Greece, Turkey, India and Argentina. Structure able to manage absolute autonomy the technical assistance, granting the local installer fast replies.

Flexibility of the production units.

HIGH QUALITY FOR US MEANS MAXIMUM ENVIRONMENTAL RESPECT

Moris Italia has distinguished itself for its commitment in the safeguard of the natural heritage, through a research in the innovation oriented at a energetic efficiency, finalized to a better materials customization.

A mission that became reality in 2008 with the inauguration of the first productive eco-friendly facility, followed by the second in 2012.

THE TWO FACILITIES HAVE
THE FOLLOWING CHARACTERISTICS:

- More than 6.000 mq covered by solar panels , allowing a reduction of the 35% of emitted CO2;
- Rain water collection and filtering system, allows to not have an impact on the local aqueduct for the processing;
- Painting room that utilizes water based paints and integrated filtering system;
- Molding system with active carbon filters;
- Chemical analysis of the waste resulting from the production and their disposal.

OUR PRODUCTS

Quality without compromise.

PRODUCTS

Components

- Pistons
- Power units
- Hydraulic car frames and shaft kit
- Guide rails
- Inverter
- Guided ram device
- UMC devices

Complete elevators

- SM 2.1
- MyLift

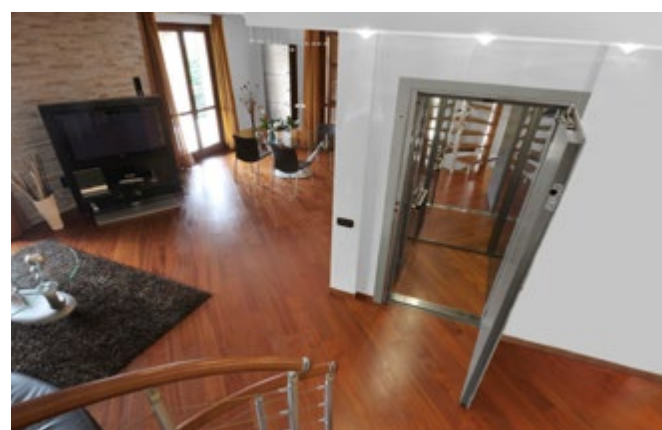

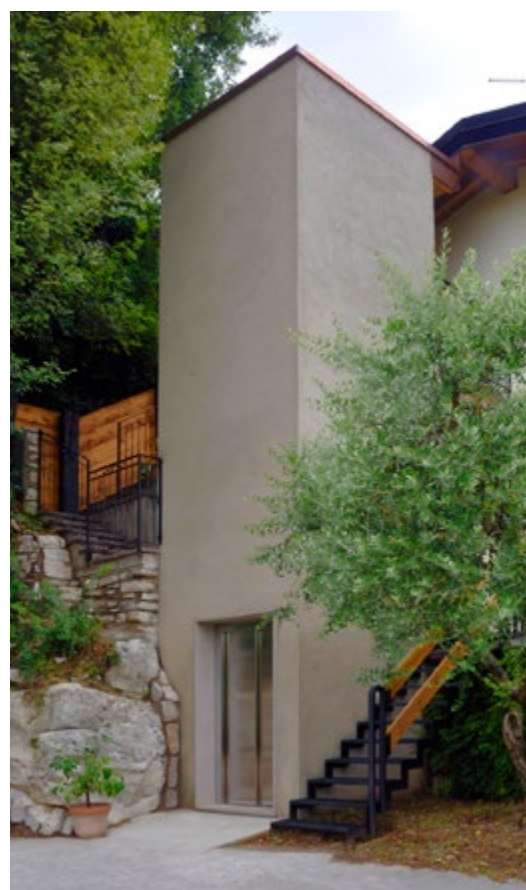

COMPONENTS

Elevators are complex machines and to offer the best performances they must be built with the maximum attention to the detail. Moris is the leader in the production of elevators and lifting platforms components, with a construction quality renewed on global scale. Who chooses to use Moris components, knows that he/she can count of the best materials, the most advanced technology, low environmental impact and a trained and efficient customer assistance.

Quality, service and support.

ELEVATORS

Our products, SM2.1 and MyLift, are designed to offer innovative solution to final users and installers. SM2.1 is the elevator suited for every building: It doesn't need neither pit and neither head room and the machinery room is stored in the cabinet.

The wide range of customizable elements, in both design and functionality, complete the distinctive characteristics.

MyLift is the oleodynamic lifting platform with the most advanced technology with a quick, non-invasive and cheap installation. The best way to grant mobility to every type of user.

Highly customizable to face every practical and aesthetical need, it is the ideal solution for any user.

**SM2.1 and MyLift. Two products.
One quality, the best.**

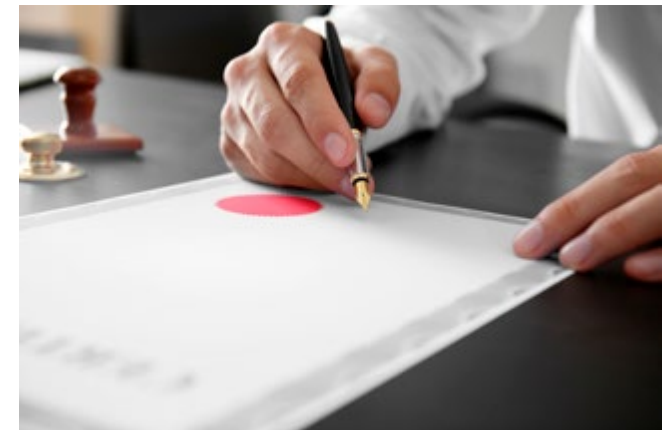

AFTER-SALES TECHNICAL ASSISTANCE

The after-sales technical assistance service, active both with phone support and on field support, combined with the immediate availability of spare parts are the optimal elements to keep the 230.000 Moris systems installed in every part of the world always at their peak performances.

QUALITY CERTIFICATION

Moris Italia puts the quality of the company process as the base of the development of the product. Since the beginning Moris has applied a philosophy of total quality developed in a complete testing process of the products, philosophy stated by the ISO 9001 certification in 1996, confirming the maximum attention to the customer requests.
